	led Ras Se'elä Krestos's i	men to them. The two victo	rious rebel gro	oups then concluded an

alliance with Se'elä Krestos, who waged several further victorious battles against the Obbos."

"At the end of the fighting the Yähabätas, satisfied with the assistance they had received from Susneyos /who reigned in the first quarter of the 1600s/, and reportedly amazed by the number of his soldiers and the quantity and quality of their weapons, came to him and, prostrating themselves, offered him their submission." The Emperor, who had become a fanatical Catholic, also pressed them to embrace Christianity, but some of the Yähabätas asked to be left alone until the next Oromo clan ceremony. [Pankhurst 1997 p 295-296] "Ras Se'ela Christos was animated by the prospect of easy victory, while the hope of rich booty excited the valour of his soldiers. Only a few years before his soldiers had refused to follow him across the Abbay into Bizamo. But now they were too impatient to wait until the end of the rainy season. --

Ras Sela Christos sent Asgadir, his general, with a large number of soldiers in order to receive the yahabata and fight the Galla. Dajazmach Buko also crossed the Abbay with a large number of his soldiers. The two commanders met in Damot from where they went to Bizamo. Here the yahabata and the ilma guozit [ilma gossa] were delighted by their arrival and they all fought against Chalya and Obo --

The Chalya and the Obo were taken by surprise. -- Sela Christos crossed the Abbay around November 20, 1618, at the head of a large army. -- The news of Selas christos's arrival soon spread terror among the Matcha, who fled in fear. -- The *gabbaro*, who forgot their earlier peaceful relations with the Matcha and remembered only their late quarrel with them, put at the disposal of Sela Christos their knowledge of the topography of the land and their large cavalry. Sela Christos took the Matcha by surprise, but killed only a few and captured little booty, because the majority had fled before the attack." "In short, the Matcha were now attacked and pursued on both sides by the allied forces of Gojjam and Ennarya. The flower of their youth perished and the bulk of their cattle was looted. The Afre had neither safety nor much property left in Bizamo. Under the shock of repeated massacre, the Afre abandoned Bizamo for Sela Christos and fled *en masse* to the vast land west of Bizamo --"

## [Mohammed 1994 p 65-67]

"The sudden dispersal of the Afre had the intended effect upon Sela Christos. Since farming was abandoned in Bizamo during the unsettled years of internal conflict, Sela Christos could not find provisions either to buy or to loot. For fear of effecting reconciliation between the Afre and the gabbaro, the latter were not looted. The shortage of provisions seems to have diffused a spirit of restlessness among his soldiers. The connection between hunger and rebellion was so strong that the slightest exposure to this deadly enemy would have exposed Sela Christos to danger. Thus after six days' stay in Bizamo the governor abandoned the land he had won from the Afre and 'returned to the land of Bota, where he previously left his provisions.' The gabbaro for whose cause he had imposed so much devastation upon the Afre thought of only one thing - the Matcha revenge if they were to remain in Bizamo. They asked Sela Christos to take them across the Abbay. He gladly accepted them, since it was part of his strategy to strengthen the defenses of his provinces by settling them in key places on the other side of the Abbay. --They were to be settled where he wanted it and not where they chose. They were conducted without delay, and when their strength was collected on the other side of the Abbay, their new settlement assumed the atmosphere of a solid and dependable fortification for the defense of the region. Their swift horses and unquestionable hatred for the Matcha excited the pride of Susenvos and elated the hopes of the Christians for the safety of their land." The entire gabbaro people were settled in the two districts of Wambarma and Wambarya along the Abbay. [Mohammed 1994 p 65-69] "-- the coming of the Oromos had on the other hand led to the assimilation, or in some instances only partial assimilation, of various ethnic groups, notably in the case of Bizamo and Damot, where there had been extensive Oromo intermarriage with Gafats." [Pankhurst 1997 p 307]

"Bizamo was another of the south-western provinces 'captured' -- by the Oromos. To curb

their expansion Susneyos /who reigned during the first quarter of the 1600s/ carried out three expeditions in the area. In the first he is said by his chronicler to have devastated the country of the Boran Oromos and laid it waste, but in later ones they fled without doing battle. The territory nevertheless remained firmly under the control of the Oromos, and was entirely inhabited by them as Almeida explains. Some of the original Bizamo population intermarried with the Oromos, but the remainder, like several other southern peoples, withdrew northwards across the Blue Nile to territories under imperial rule." [Pankhurst 1997 p 347]

By 1969 Boditi was		
	7 km away, and the water was free for all (though cattle was an assembly hall which could take about 1,000 peop Soddo and Arba Minch. The clinic was run by an 'advan with about five private 'doctors'. No one in the town own	ole. There iced dresse	were bus connections to er' who had to compete	

Practically all the inhabitants were Christian, and there was one Orthodox church. There were some 25 shops and 27 bars. There was a new government school building and 530 children of whom 25 girls. There were also mission and church schools. The Tobacco Monopoly was in some way represented in the area. [Report presented to the University of Lund, Sweden] 1980s Population about 4,400 in 1984. Population about 13,400 in 1994 (tripled in ten years?) and about 16,500 in 2001. 1990s V Halldin, Etiopien, Sthlm 1971 1st ed, p 66 exterior picts of elementary school; ditto 2nd ed 1974: p 86 = p 66 above Boditi (mountain) 3520 m, see under Gaysay HCM.. 07/39 [Br Ca] JBS53 Bodle (Bodleh, Badle, Bedle) 05/42 [WO Gz] 05°02'/42°48' 417 m HCD81c Bodo 06/37  $[\mathbf{X}]$ Area with market place at the road Chencha-Gidole. There are long rows of sitting-stones 1950s or stones for displaying goods. Market days were Thursday and Sunday in the 1950s. The visitors are Dorze and several other peoples. [Straube 1963 p 162-163] 1970s The wide market place on a slope has some sixty rectangular houses at two of its edges. Judith Olmstead stayed in Bodo and had a local-type bamboo house built for her on a hill. The Dorze men even agreed to make windows as rain-protected holes, even if this was against their local tradition. Judith bought a bull to be slaughtered and invited some 150 Dorze to attend at the blessing of the new house when completed. The Dorze also gather and celebrate the Meskel feast. Market is still held twice a week at Bodo. The Dorze nowadays are weavers rather than farmers. [National Geographic, January 1973 p 124-141] **Bodo**, at some distance from Gewane JD... 11/41? [x 20] (In Afar language: Kada Bodo = Large B. and Ounda Bodo = Small B.) The southernmost of the sites, on the eastern side of the lower part of Awash river, which were investigated by palaeontologists in the 1970s. "There were two prominent artifact levels. The lowest, consisting of coarse sands and gravels, contained large numbers of moderately abraded handaxes and concentrations of broken-up vertebrate fossils; the second, a thick overlying sand, contained artifacts of all sizes, whole skulls of large animals, and minimally disturbed skeletons. -- we found several hippo skeletons lying side by side." [J Kalb, Adventures in the bone trade, New York 2001 p 181] Hominid fossils were first found at Bodo in mid-October 1974, exactly two years after the 1970s very first ones in the Afar region had been found at Hadar. The person within the foreign expeditions who actually found them was in both cases Alemayehu Asfaw. The Bodo hominid original find consisted of most of a maxilla and palate. By searching and screening for a week much of the rest of the cranium was recovered in small fragments. [Kalb p 238-243] In spite of war in the Ogaden Jon Kalb and others visited Bodo two years later in March 1978, and then shared camp with a UN team studying breeding colonies of the graineating bird quelea. During a week the "bone hunters" recovered 200 more bone fragments, many of them belonging to the first skull, and also remains of a kind of large baboon. [Kalb p 266-267] 1980s The first Bodo skull was taken overseas to Berkeley and a fragment of a second hominid was found in 1981. [Kalb p 290] "In Ethiopia Sleshi /Tebedge in 1982/ was joined by his graduate supervisor, paleontologist Ernest Lundelius Jr. -- who would accompany him to Bodo to see the area firsthand. Also joining them would be Tsrha Adefris and Clifford Jolly, who was still her graduate supervisor at New York University. Tsrha had completed her master's degree and returned to Ethiopia, where she hoped to begin her Ph.D. dissertation research on the

Bodo skull. When she arrived in Addis Ababa, however, she learned that White and Clark had taken the skull to Berkeley, ostensibly so that an Ethiopian then studying with them could use it as a 'training fossil.' After a brief visit to the Middle Awash in mid-July, Lundelius and Jolly returned to the United States, while Sleshi and Tsrha remained in Ethiopia."

"Just before the two Berkeley teams left for the field /at Awash in mid-September 1982/ the Ministry of Culture informed Clark, White, and Johanson that their field permit was suspended. -- In early October the central government, the Derg, issued a nationwide proclamation ordering the suspension of *all* prehistoric research in the country." [Kalb p 291-292]

[Varde ljus! (EFS calendar 1928) Sthlm 1927 p 21-29 with photo of the Fitawrari as an old man]

In early 1898 a trading caravan arrived in Nekemte. With it were Abba Gabru (more properly Gebre Ewostatius) and his wife Gomesh. They had stayed for about a year at Jimma as Evangelical teachers. In Nekemte Abba Gabru had the opportunity to make a request to the Oromo chieftain from Boji, Fitawrari Debaba Bekari, who was in town with his men to pay the dues from his district. Daniel, a companion of Gabru, was called to Nekemte, and with the Fitawrari's permission they could travel to Boji.

In the beginning they were given a guest hut inside the Fitawrari's compound, and they were permitted to preach in the market square and to collect people for Evangelical service. Because of the support of the Fitawrari, the Orthodox priests remained friendly. The members of the Swedish mission in Eritrea did not know about this until a letter arrived in 1903. By then they had educated two young men Samuel Danki and Boru Siba to assist them.

[Bortom bergen vol II, 1954 p 133-138]

An evangelical pioneer Gebre Ewostateos Ze Mikael (born c. 1865) came to Nekemte in 1898 and tried to find employment through the governor. The governor's relative Fitawrari Dibaba (age about 60) happened to be there, looking for more priests for his church in Boji. He heard Gebre Ewostateos read from the New Testament in Oromo and sing hymns and was amazed. Governor Gebre Egziabher consented that he could be employed at Boji, remarking that the clergy from Gojam would never permit the Holy Scriptures to be read in Oromo in Nekemte Maryam. In Boji Maryam it would be possible, he added.

Gebre Ewostateos with wife Gumesh and children settled at Boji (then called Karkarro) before the end of 1898. He was joined in 1899 by an Oromo Daniel Dabala (b 1866, known as Daniel Lulu at Boji) and his wife Tiru.

Gebre Ewostateos was well established within a year. He became a secretary and chaplain of Dibaba, was allotted a large piece of land to farm, and a house was built for him close to Dibaba's residence. This house was large enough to include classrooms for students. Gebre Ewostateos undertook extensive journeys to preach the gospel in villages and market-places where nobody had heard it before. A number of village schools were organized. Gebre Ewostateos spoke Oromo well, having learnt it from Onesimos, but in church he spoke Amarinya for the sake of his colleagues from Gojam, with Daniel interpreting into Oromo.

[Arén 1978 p 395-398]

1900s It became a custom for Fitawrari Dibaba and many others, women as well as men, to go to Qes Gebre Ewostateos's house after church and have a gathering where Oromo was spoken.

As a prince of old royal stock Fitawrari Dibaba had married six women. Under Christian influence he abstained from marital relations with five of them, provided them amply with land and retained only Gifti (Princess) Wolete Giyorgis as his wife. She learnt to read her New Testament in Oromo. Dibaba himself learnt to read only at old age, after having obtained spectacles.

[Arén 1978 p 400]

In April 1903 the evangelists at Boji received supplies through the Oromo Habteh Yimer (b 1872) who made the round trip from Asmera in not quite six months. The group around Gebre Ewostateos was doing well, and his wife Gumesh had introduced combing cards for the dressing of cotton in preparation for spinning, something she had learnt at the Swedish mission at Massawa. Sudanese cotton could be obtained after the establishment of Anglo-Egyptian rule there in 1899. Gebre Ewostateos sometimes bought slaves (naked), gave them clothes and a plot to cultivate so that they could exist as freed humans. [Arén 1978 p 406-408]

The evangelical pioneer Daniel died on 13 August 1904, leaaing his wife Tiru with five small children.

Gebre Ewostateos died on 10 April 1905. He had saved some children out of houses

threatened by a grass fire and intended to save some horses when he was trapped in a stable and burnt to death. His religious critics among the Orthodox clergy said that it was Virgin Mary who had taken revenge. The young Qes Badima Yalew performed the funeral rites at the church of Boji Maryam (Qes Badima was much later, from 1940, to have charge of the Mekane Yesus congregation in Addis Abeba).

The work of Gebre Ewostateos was carried on to some extent by others, such as his coworker Akalu Ingida (1877-1977) who lived to become 100 years old. [Arén 1978 p 410-411]

A month after the death of Gebre Ewostateos arrived, after a journey of 4 months from Asmera in Eritrea, Gebre Yesus Tesfai (b circa 1877) and his young wife Wuba Zennebe (b circa 1879) to reinforce the evangelical group. Its direct tie to the Maryam church was gone, however. Gebre Yesus represented the Swedish EFS mission. He died in Boji in 1925.

[Arén 1978 p 420-423]

The evangelist Tegenye worked at Boji around 1907, one of seven places in western and south-westrn Ethiopia having such evangelical work at that time.

[Arén 1978 p 431]

Gudina Tumsa, son of Tumsa Silga and a future leader of the Mekane Yesus Church, was born in Boji. An uncle of his was *qalicha*. Gudina went to the school where two evangelical teachers taught children to read. He also embraced the Evangelical faith and cut down a big tree where the villagers used to bring offerings to the "spirits". The villagers were enraged and Gudina had to leave Boji at once.

His father Tumsa Silga died in sudden great pain after a business trip to the Abay valley to buy cotton. It was believed that he had been poisoned by his business contact. [Saeverås 1993 p 29-33]

1920s Old Fitawrari Dibaba died on 13 June 1927, sitting over a book when his heart ceased to beat.

Chiefs for the Boji area had first governed from Nejo (Balambaras Wakayo Bonya, then his son Fitawrari Disasa and then one Fitawrari Angos), Fitawrari Dibaba had been appointed to govern from Boji in the late 1800s (while it was still called Karkarro or Korkorro), and he was a relative of Dejazmach Morida of Leka. Dibaba was suceeded by his son Fitawrari Oljira who died in 1931.

[Nordfeldt 1935 p 90-91]

In the late 1920s there was no longer an important residence at Boji as there had been thirty years earlier. The EFS mission had a school there in a prayer house. Its teacher was named Boshan Sida, and there were about thirty pupils.

[M Nordfeldt, Med vägröjare .., 1934 p 12]

Emmanuel Abraham, of the Mekane Yesus Church and for a period also Minister in Haile Selassie's Government, was an Oromo born in Boji.

[Grensted 2000 p 26]

Qes Gudina Tumsa of the EECMY was born in Boji in 1929.

1930s Traditional travel used to take 4 or 5 hours from Nejo to Boji. In the early 1930s, teacher Bushan worked there for the Swedish EFS Mission, and he had some 40 students. The old "bible woman" Febe still lived there.

[Varde ljus! Stockholm 1934 p 53]

The Swedish missionary Dr Söderström at Nekemte in 1932 made a "vacation trip" with a little caravan, and they also passed Boji to meet the local teacher Boshan and his family. EFS also had a local evangelist at Boji.

The Söderström party rested for a while in the schoolhouse and then they were invited to three meals with different hosts in rapid succession. For reason of courtesy it was difficult to say no to any of the invitations. The road to Boji had been difficult because of so many steep slopes.

[Missions-Tidning .. 1932 no 33 p 389]

A. Frank and his wife were missionaries in Boji around 1935. [Zervos 1936] On 16 August 1936 the Swedish missionaries fleeing from Nejo in direction Aira met at Boji and from there continued to Sayo. The Orthodox priest Kes Beyene made a speach after the service and thanked God for what the missionaries had achieved in the country. Also after the service, the Swedish missionareis from Nekemte arrived via Gimbi. On the following day, the united group continued and reached the German mission station at Aira.

[M Nordfeldt in Jag minns den gången, 1957 p 68]

The EFS mission lost their premises to the Italians in October. A proclamation was read on market days that the mission chapel was now a sanctuary of the Catholic Church, and that it was ready to baptize and educate whosoever wanted this.

Nobody came; the Catholic priest sat alone in his church and the Evangelicals gathered in Ato Negasa Feyisa's house. The priest became so angered that he demanded from the commander at Nejo to have the Boji chapel burnt and the leader of the Evangelicals detained.

Negasa Feyisa had been warned and went into hiding when the *Commandante* arrived. Mother Febe and Ato Bushan Siba were called to answer about who had taught them and what they were doing. Febe's frank testimony made such impression that the commander gave her a little money and said that she could continue. "Do not forget to say prayers for me also."

Having received their chapel back and gathering there again, they found the Orthodox priests embittered. They refused to baptize children or have funerals at the graveyard. Old Kes Beyene, a former Orthodox priest, sided with the Evangelicals and made baptizing for them. He became accused and detained, was imprisoned in Nejo for a while and then had to answer in front of the bishop at Nekemte. However, the bishop only warned Kes Beyene and let him return to Boji.

The German Herrmannsburger missionaries at Aira were permitted by the Italians to stay on. In the following few years they used to come monthly to Boji for Evangelical baptizing and Holy Communion. Thus the congregation in Boji grew in strength (while the one in Nejo deteriorated badly).

[Bortom bergen vol II, 1954, p 149-150]

1950s The EFS mission in early 1950 opened a clinic at Boji, with one Ethiopian dresser and in the beginning using a rented building. A new clinic building could be used from 1953, and a dwelling room for a planned nurse was included there.

[Bortom bergen vol II 1954 p 155]

The clinic at Boji was run by an Ethiopian dresser around 1958 and into the 1960s. The clinic at times had few patients, and it was suspected that local "illegal medicine" was the cause.

1960s EFS continued to keep its station at Boji throughout the 1960s. Missionary nurse Lydia Larsson arrived in 1964 (or/and left in that year?). She had a mule named Chank which she used when visiting patients.

1930s	An American mission family in 1936 were trying to			
	after the Italian invasion. From people they knew in		-	
	can get through if you travel at night. There is heavy	-		
	through the town about four in the morning the drun up yet. You can go beyond the town for a couple of		-	
	away from the road. Then you'll be able to get into It	-	•	
	The American Forsberg couple Malcolm and Enid (p	•	-	
	Alamo started according to the advice, but Greeks tr			
	village. The Forsbergs succeeded to pass through Bola without being attacked even if they			
	saw men with guns watching them when they left on the other side:			
	"It was four-thirty when we saw the first huts dimly outlined against the dark sky. There			
	is something ghastly about squat thatched roofs at night, especially so when one has to			
	pass through a village of hostile people. It was death			
	prayed the dogs would stay quiet. Now we had passed the upper section of the town and,			
	driving the mules mercilessly, clattered through the stones. When we reached the lower			
	section of the town, it was light enough to see We could hear women at their			
	grindstones; the day began early for them. At the last hut a man stood by the door, rifle in			
	hand. Perhaps we took him by surprise for he did not move. The road began its descent			
	toward the Demi River, still several hours away. Three hundred yards from the hut a waterfall splattered over the stones right beside the road. We stopped in plain sight of the			
	man with the rifle, for we had to have water and might not find any more the rest of the			
	day."			
[M Forsberg, Land beyond the Nile, New York 1958 p 93-96]

	Dessalegn Rahmato. Bolosso is "the beneficiary of man	•••	
	extension service by the Wollaita Agricultural Develop		, ,
1970s	According to a WADU study of 1971 about 30% of Bo	losso house	eholds did not use ox-
	drawn ploughs for cultivation.		
	Of peasants interviewed ten years later, 52% did not ow	/n oxen.	
	[7th Int. Conf. of Ethiopian Studies, 1984 p 587, 592-59		
	Previous to the land reform, the majority of Bolosso per	-	small owner
	cultivators, and tenancy was not very widespread. Abse		
	significant force. A study in 1976 found that 58% of the	e population	n used oxen and
	ploughs, and 42% hand hoes.		
	Bolosso was densely populated with a rural population	of about 10	00,000. There were 43
	Peasant Associations. The wereda was unique in having	g a wide ne	twork of roads, usable
	for cross-country vehicles. It was culturally homogenou	-	
	• • • •		
	though a small but active minority of Protestant and Catholic converts formed a sub-		
	culture. Bolosso used to be always self-sufficient in food crops.		
	[Dessalegn Rahmato, Agrarian reform, Uppsala/Sweden 1984 p 11-12]		
	The land reform did not mean any complete redistributi		
	distributions took place in 1976, 1977 and 1978. "As th		
	expanded with the infusion of new members, the deman	nd for land,	and hence re-
	apportionment, became greater, and it was quite eviden		
	accomodate everyone."		position to
	With time, 69% in Bolloso had borrowed money, which	was high	compared with other
	•	-	-
	weredas, though the sums borrowed were small. About	43% of the	e peasant were involved

in non-farm occupation, mostly petty trading. [Dessalegn as above, p 44-45, 65, 70]

1990s Prime Minister Tamirat Layne on 1 June 1994 began touring villages in the faminestricken Bolosso District. In this district alone, over 5,000 people had so far died of famine or malaria, 60 per cent of them being children. Over 295,000 famine victims had been registered in Bolosso District alone. [Horn of Africa Bulletin]

Village about 50 km NNE of Asosa. There are large outcrops of quartz. Along the Shongud creek the local inhabitants have recovered gold from pits. [Mineral 1966]

1900s On 27 February 1901 the H.H. Austin expedition from Khartoum southwards to lake Turkana ascended the hilly Boma plateau. They followed the Akobo river and turned south along the Kibish river. Austin surveyed the line that would ultimately become the Sudan-Ethiopia border.

[P J Imperato, Quest for the Jade Sea, USA 1998 p 233]

1930s A party with Per Sandvik arrived at Bomo around 1930. They made camp under a large wild fig tree. The aged sheikh paid them a visit, and an Austrian in the party played European music to him on a grammophone. Next day, after the majority of the party had continued towards Yubdo, the 'queen of the district', Sitt Seneba Bint Ibrahim Efendi, came and also wanted to hear 'the ghost in the box', and she brought an ox as a gift. They lighted some firecrackers for her further entertainment. Neither the sheikh nor the queen showed any reaction of how they experienced these unusual phenomena. When passing at another time, Sandvik did not meet others from the expedition as expected. The main camp had been moved four days' march southwards. Sandvik visited the Arab shop keepers in the village and found that he could buy sugar, salt, a pack of candles and a tea kettle.

[P Sandvik, I Etiopia ...Oslo 1935 p 26, 60]

- ?? Boma (in Gojjam, near Bure or Dembecha?) ../.. [x]
- 1941 In General Nasi's view Colonel Natale had been bluffed out of Burie and had failed to crush a far inferior enemy. He had furthermore evacuated two outlying posts, Boma and Fort Emmanuel, and against Nasi's express instructions had not defended the line of the Tamcha river. [Mockler 1984 p 348]
- JDD62 Bomba 08°44'/42°43' 1493 m
- JDJ19 **Bombas** 09°13'/42°28' 1583 m 09/42 [Te Mi Gz] 100-125 km from Dire Dawa on the road to Jijiga: Large quantities of potassium feldspar (orthoclase) occur in pegmatite gangues, accompanying granitic intrusive bodies. An area particularly rich in pegmatites is located near Bombas. [Mineral 1966] By the early 1980s there was a well functioning sand dam for water.
