Carara, Carrara, ethnic group of Somali origin in eastern Bale.

JDK31 Carara (Carrara) 09°26'/42°30'

09/42 [WO x]

MS coordinates would give map code JDK40 further to the north-west.

Area with mine about 32 km from Jijiga and north-northwest of the Gureso mountain.

Named from a mine in Italy? - Italian spelling with C is retained here.

The place was around 1965 connected by a bad road with the Harar-Jijiga main road. An expedition of the Società Anonima Mica in April 1937 found a site Carara which was prepared for economic exploitation.

"From the micaceous rock extracted it is expected to obtain 20 per cent of mica -- grade 3, and if - as seems likely - the deposits of micaceous rock improve at a greater depth it should be possible top obtain 5 per cent of the higher grades. The mineral is being selected and treated on the spot prior to being shipped to Italy."

[F Quaranta, Ethiopia .., London 1939 p 69]

Mica, though of mediocre quality, was mined during the Italian occupation at the Carara drift near Jijiga.

[Mohr, Geology 1961 p 35]

"As a change in the granite area, a 100 sq km basic mass composed of green diorite grading locally into the schists crossed by many granite dikes occurs in the basin of the eastern tributary of the Fafan River (Marchan) and occupies the Carrara area."

There are mica deposits in pegmatites in the Shebelli-Carara-Tulu Hora area. They were mentioned by E.W. Molly in 1928. French companies worked in these areas before the Italian occupation, but they later abandoned their efforts.

In 1939, *Mica S.A. per le Industrie Estrative in Africa Orientale Italiana* commenced the exploitation of mica without any systematic prospecting. The production, partly of raw and partly of cut mica, in Shebeli and Carrara is given to have been 52,937 kg during 1939-1941.

There are gneisses which contain biotite and muscovite. The muscovites of Carrara represent sixth-class 'stained mica' and cannot compete with commercial Indian mica in quality or size. (The Carrara mica did not satisfy tests as electrical insulator.) The reserves known in 1965 were small but might be used for local industries.

Garnet (almandine) occurs in large quantities along with the mica of the Carraro deposit. Small-scale operation by local inhabitants takes place.

An Oromo by the name of Hordofa was made tax-collector of Chabba /one of the Chaba above?/ by the Italians around 1937. The Oromo men at Chabba refused to give him his due so Hordofa appealed to Addis Abeba for Italian troops. These were attacked and defeated by the Patriot leader Dejazmach Zewde Asfaw who was based at Addis Alem /in the Gondar region/.

[3rd Int. Conf. of Ethiopian Studies, 1969 p 306]

HCL90 Chabbi (Ciabbi, Chubbi) (volcanic mountain) 07/38 [Gz WO Gu x]

07°11'/38°26' 2284/2298 m

The dormant domiform volcano of Chabbi (Chubbi), north of lake Awasa, has extruded several large and very recent flows of rhyolitic obsidian lava with pumice at the base. This volcanic succession lies upon recently faulted lacustrine sediments. It is noteworthy that the only known very recent extrusions of silicic lavas in the Main Ethiopian Rift, those of Chabbi, are associated with transverse faulting, itself extremely rare.

"There are at least two buried centres of eruption, the higher and larger of which shows some evidence of circular subsidence. Fast of the summit an older pyroclastic cone.

some evidence of circular subsidence. East of the summit an older pyroclastic cone manifests intense fumarolic activity around its flanks, minor subsidence in its denuded crater, and a 5m-diameter steam blow-hole descending obliquely into the hillside."

"-- blow-hole from which great puffs of steam are emitted at fairly regular intervals. There are local reports of the mountain glowing at night, and of ashes falling on Shashemene during the Italian occupation."

Centre at least 1956-1980 of Metekel awraja & of Gwangwa wereda.

With post called sub-post office until the 1990s.

Distance 504 km from Addis Abeba.

Within a radius of 10 km there is

the high plateau Belaya (Belaia), average 1950 m

1950s Population 1,356 as counted in 1956.

Around 1957 Kedamawi H. S. Ber was the westernmost end of telephone lines in Gojjam.

Sub-province Governor of Metekel awraja in 1959 was

Major Asfaw Gabre Amanuel.

1960s In Kedamawi Haile Selassie Ber school 5 students passed 8th-grade examination

in 1960.

A health centre was built and ready by 1963.

In 1967 there was a telephone for the provincial governor's office and one for

Captain Asfaw Gabre Amanuel /= governor's home?/, plus one for the

Public Health Clinic.

The primary school in 1968 had 535 boys and 144 girls, with 13 teachers.

The junior secondary school had 63 male and 13 female students in grades 7-8;

no regularly employed teacher in 1968?

1970s Spelling used in the post office around 1975 was H.S.I BER KETEMA.

Telecommunications used a title KEDAMAWI BER.

1980s Population about 8,400 in 1984.

1990s Population about 17,800 in 1994 and 21,900 in 2001 - rapid growth.

?? Chago ../.. [Mi]

Because of iron outcrops, a detailed survey of the Chago area was made by Stern and Lapajne and a geophysical survey by Ravnik and Kelhar, all of them belonging to the RUDIS Mining Association (reported in 1964).

Diorites prevail in elongated bodies at the east along the river Birbir. Gabbro is outcropping to the west. To the north there were magnetic anomalies, suggesting steeply dipping ore bodies.

The occurrence of iron ore 4-5 km south of the Chago village was investigated. The main body is a lens 400 m long with a thickness of up to 2 m. H.A. Quinn in 1962 noted a trench 300 x 5-10 m as evidence of earlier exploitation by local inhabitants. The iron ore itself is rather coarse-grained, massive martite with a little residual magnetite. It contains 70% of iron. In general there are light brown metasedimentary rocks, slate, argillite, gray fine-grained quartzite, light brown arenaceous muscovite schists, and phyllites.

?? Chakata (valley in Adola area of Sidamo) ../.. [Mi]

Graphite deposits have been indicated in the Chakata valley, near a power station at Mormora river. [Mining 1966]

HDT52c Chakata (Ciacata, Tchakata, Ch'aqäta) 10/38 [Ad It 18 n]

(sub-district, centre in 1964 = Gelebie)

Wilfred Thesiger led his force down the escarpment and arrived at the bottom at dawn on 17 May 1941. He followed the valley northwards with the Chakata plateau on his left. "They were sniped at by Muslim Galla tribesmen from the cliff tops, formerly pro-Italian, now waiting to see who would win." (Sketch map on p 200 in Shirreff.)

"By dawn on 18 May the Italian column was established on the Ciacata plateau, with the 3rd Colonial Brigade facing towards Deraa, after a long hard march from the Boto river (described by Maraventano as the 'Via Crucis'). At 7.00 a.m. the commander of the 3rd Brigade, Nuovo, reported 'several thousand' enemy advancing in attack formation -- This was Wingate's force with Ras Kassa's 1200 rifles -- climbing onto the Ciacata plateau at dawn on 18 May. -- Johnson recalled the shell fire, 'The first salvo went over, the second fell short. We ran forward and avoided their third salvo."

"-- patriot forces advanced against the right flank but were held up by heavy machine gun fire. Johnson's Sudanese were withdrawn in the evening having suffered losses of one killed and three wounded. -- Patriot losses were 40 killed and 100 wounded, and the survivors of the 300 Patriots on the left flank 'who had crept forward within a short distance of the enemy MGs, could not be extricated, and remained there until the enemy retired two days' later.' --

After firing ceased at 5.00 p.m. the Anglo-Ethiopians buried their dead and recovered their wounded from close to /the enemy/ lines, but many had to lie out and 'their groans and cries for help' were heard by the Italians. Maraventano records his own casualties as one officer and 32 *askari* killed and 78 *ascari* wounded."

On 19 May the Patriots renewed their attack and were met by machine-gun and artillery fire. "Nott noted the difficulties of operating with patriot forces who, although extremely brave, had their own way of doing things. On 18 May he had to quell fighting between two tribes of Ras Kassa's men waiting to go into action --

/Ras Kassa/ sat on his shooting stick like an English country gentleman watching a pheasant drive."

The stage was set for a decisive battle. "Maraventano started his march from Ciacata at dawn on 20 May, the 3rd Brigade breaking off contact with the Patriots and passing through the 19th Brigade, which became the rearguard. In the advance guard under Major Torielli were the cavalry and mountad *banda* and the training battalion. Making an early reconnaissance, Wingate and Nott discovered that the Italians were withdrawing."

"The siger -- moved his force to a low ridge near the edge of the plateau. As they took up their positions they saw 'The Italians advancing across the plain in dense formation'. The

Italians then halted and opened with artilley fire; the first shell landed near Thesiger and knocked him over and he received a shrapnel wound in the right leg. The infantry then attacked, but the combined fire of Thesigers's 400 rifles -- brought the attack to a halt." There was also a charge from the Italian side by native cavalry.

"Fearing that his force would be surrounded Thesiger decided to withdraw northwards to a second ridge, which formed the northeast corner of the plateau overlooking the Jescium river gorge." Captain Rowe was killed during the retreat and also two Ethiopian men, Rifleman Haile Abatu and Corporal Wandafrash Falaka. About 30 Patriots were killed or missing.

"Meanwhile Maraventano had reoccupied Uogghidi and at 2.30 p.m. launched two battalions, the 72nd and the 21st, in a counterattack against Ras Kassa's Patriots who were pressing his rearguard closely. -- when Wingate went forward to reconnoitre,

'Maraventano's 7000 fighting men were being contained on the south side by 1500 Patriots, 35 Sudanese and the Mortar Section, on the north by Thesiger's 400.' Italian casualties for the day were one officer and 12 *ascari* killed , three officers and 165 *ascari* wounded, 20 horses and eight mules killed or wounded."

"On the afternoon of 20 May Wingate had sent to Maraventano a letter informing him of the surrender of /the Duke of/ Aosta at Amba Alagi on 19 May and giving him 24 hours in which to decide whether to surrender, saying that he had orders to withdraw all British personnel and leave the conduct of operations to the Patriots."

Maraventano consulted General Nasi at Gondar and called a council of war of all his senior officers. Meanwhile Wingate sent another stronger letter "demanding instant surrender or he would take away the whites and leave the Patriots to finish it off. -- it was a superb bit of bluff."

On 22 May Major Nott and Lieutenant Colonel Nuovo negociated for two hours at a eucalyptus tree on the plateau. Among terms agreed on was that safety of the Italian column would be guaranteed until arrival at a prisoner of war camp in Addis Abeba. "It is evident from all Italian accounts of the campaign that the concession of honours of war and the right to bear arms were of immense psychological and historical importance and enabled the Italians to salvage some pride from their defeat in the campaign." "The day 23 May started badly with a series of explosions from the Italian lines, the *ascari* throwing away their hand grenades. Wingate sent Lij Yohannes, Ras Kassa's liaison officer, at the gallop to tell Maraventano that he would order a general advance if the destruction of war material did not stop."

During the formal surrender (at the eucalyptus tree) Wingate received Maraventano on horseback with Ras Kassa beside him.

Wingate set off from Chakata with his column of prisoners on 24 May on the long march to Fiche, which they reached on 29 May.

?? **Challa** (historical capital of Gera)

The Gibe kings built merchants' villages known as *mandera*, sited near their main 1800s masseras in their capitals. One such merchants' village was in Challa, capital of Gera.

[Mohammed 1994]

?? Challa (small state)

1850s "The following drama was played before the eyes of the first Italian bishop of Oromoland in the late 1850s /Massaja/. The people of Lagamara and Challa went to war over an incident involving a woman who abandoned an Abba Dula of Lagamara for an Abba Dula of Challa. The true motive for the war, however, went far deeper. It was a question of the political and economic ambitions of the three Abba Dulas of Lagamara and their followers. In the battle following the incident, the Abba Dulas of Lagamara routed those of Challa, who fled to safety in the neighboring states. Their followers escaped into the forest but were soon forced by hunger and exposure to return to their land. With tears in their eyes, the unfortunate peasants of Challa begged the victorious Abba Dula for mercy.

This was granted, but at a terrible price. The three Abba Dulas divided the land of Challa among themselves and only allowed the vanquished to return to their homes on condition of submission and subservience to the victors." [Mohammed 1994 p 120]

"According to Massaja, the victorious Abba Dulas of Lagamara took all the uncultivated land of Challa and divided it among their followers. It was in this fashion that the war leaders and their followers became the owners of extensive land in the Gibe region. When a successful war leader made himself king, even forests became his property. Besides reducing the peasants of Challa to tenants on their own land and taking over all the uncultivated land, the three Abba Dulas of Lagamara made the public pastures of Challa into the common property of the people of both Lagamara and Challa." [ditto p 121]

1900s Around 1905 there was a government customs gate at Chaliya on the road

Addis Abeba-Nekemte.

An Oromo man Ashana grew up in the village Tege three hours' march from Aira. Around 1940 Ashana had become converted by the German missionaries at Aira. His mother in Tege was a sorceress, *qallicha*, so when Ashana tried to preach there he met much hostility and therefore moved to Challya. After a while Ashana's mother also wanted to

become a Christian, so the belief in *qallichas* was shaken in his home village.

The first church but at Challya was built in 1942, and ten years later there was a three

The first church hut at Challya was built in 1942, and ten years later there was a three times larger church and Ashana was its Evangelical priest.

However, when the congregation first wanted to elect Ashana as their priest, it was believed that he was not suitable because he had remarried (his first wife had died). Instead a young man who knew Amharic was elected, but this man could not adapt himself to the priest school and quit after one term. Then Ashana was unanimously elected. He passed the priest school in Nejo without having any previous formal

education.

[Bortom bergen vol II 1954 p 201-203, with Ashana's phot at p 161]

Swedish missionary Hagner tells about the carpenter Ashana: Some ten hours by mule from the home of Ashana there was a lowland area known for bands of robbers. One robber who must flee after a fight with his brother tried to find refuge in Challya. The villagers did not want him to stay there but Ashana received him in his home on condition that he should take part in Evangelical gatherings. He was taught at the Swedish mission station at Nejo. Then the former robber returned to his home village and started an evangelical movement there. Ashana himself had been converted by the German missionary Wassmann at Aira. This seems to have been in the 1920s. His mother was a *qallicha* but she also became an Evangelical Christian after her big snake had died. There was a medicine man Abba Terso, "who kept the people in complete slavery". After he had died, and also his eldest son had died suddenly, it is said that demon cult in Challya came to an end.

On 1 February /1948?/ the missionaries Hagner and Lundgren travelled about six hours from Aira to Challya and were received in Ashana's home. The above-mentioned "robber" also came there and was even admitted to holy communion, led by Gustav Arén. A number of 38 Oromo were baptised on that occasion. An estimated 1,100 persons had gathered in Challya for the occasion, with an open-air service lasting two hours. [Johan Hagner, Guds under i Gallaland, Sthlm 1948 p 19-21,25-27,29,44-52] Challya became the centre of an important Evangelical movement in Wellega in the 1940s. The first Evangelical Christian to teach and preach in the area was probably Habte Maryam, who came from Boji. One of his students was later known as Kenyazmach Shuramo Yaddessa, who started Evangelical work in Mendi.

[A brief history of the Mekane Yesus Church, 1980 p 44]

In 1950 the EFS mission had a course for about 50 voluntary evangelists in Challya. Swedish EFS had been caretakers of the German Hermannsburger mission station at Challya, but the Germans returned in 1951.

From early 1948 to 1953 the EFS Mission had some medical service in the Challya area. Nurses Kerstin Perols and Ingrid Hellman were there around 1952 and Margit Larsson (b.1917) worked there at least in 1953.

On 1 February 1964 the German missionary Horst Spingies was killed in a car accident in Challya. He was married to the Swedish missionary Filippa née Mårtensson.

1970s Around 1974 the ECMY project at Challya had brick kiln, electric power, saw mill and workshops for welding, carpentry and building. Mr Kruzer and Ato Berhano were coordinators of the project.

The Swedish EFS agronomist (*lantmästare*) Lars-Jöran Edström (b 1948) worked there in 1980-1983. Before that he had been in Sudan 1978-1979.

Channo is a local centre 40 km east of Debre Birhan, on the escarpment of the high plateau.

Channo: Arramba

1840s

"An extremely steep road -- brought us -- to Arámba. After crossing the district of Arraba Amba, which pays tribute to the crown in agates -- picked up on the face of the soil, the path wound above three miles along the channel of the river Shonkorghie -- The scenery was especially beautiful; and in a romantic glen, partially secluded by a grove of tall trees -- stood the picturesque church and monastery of Our Lady /Maryam/."

"Arámba was taken from the Areeo Galla /Ari Oromo?/ by Abiyé, third monarch of Shoa; and now -- is garrisoned by a strong detachment of gunmen -- No stranger is permitted to enter the village without first giving the personal security of one of the inhabitants; and access is not under any circumstances allowed to the stronghold, which occupies the apex of a rocky ridge, possessing great natural strength. Here, in a succession of long barn-like buildings, are consigned to mould and cobwebs, and jealously guarded, every civilized invention received by the despot --"

"Our camp was formed on a small level terrace, of which the precipitous brink overlooked a deep dark valley containing the sources of the Arámba water, each flowing through a narrow rocky ravine. Extensively cultivated, and echoing to the shrill voice of the partridge, it is studded with cottages -- Wóti, towering amid dense forests of timber, and appearing to bear on its venerable summit the crumbling ruins of a giant castle, shut in the view on one side, whilst on the other, far beyond a remarkable pyramidical hill called Koka, could be traced the jungly banks of the Awádee, gradually fading into the blue perspective of the Adel desert."

"We experienced every civility at the hands of the governor and Shálaka; the latter of whom insisted on mounting guard over our tents in a small temporary bower erected as a defence against the nocturnal cold. Supplies of every description were furnished in regal profusion."

[W C Harris, The highlands .., vol II, London 1844 p 359-361]

HDM66 Channo: Fare

Antinori and Chiarini arrived at Fare on 28 August 1876, while their compatriot Martini who had been sent back to Italy to get more supplies, had still not reached Rome. [A Cecchi, vol I, 1886 p XXVIII]

On 2 October 1877 a caravan of Cecchi and others arrived at Fare, in rather bad condition but escorted up from the Awash river by guards sent by Menilek. On Cecchi's map this Fare is shown to be located 20 km north-east of Ankober. Martini had tried to go in advance to Fare to ask for assistance, but he did not arrive there before Menilek had sent the escort. The members of the caravan were met at Fare by Antinori, Chirarini and Martini, and also by the governor general of Shewa, Azaj Welde Tsadik. The Italians did not feel that the local people were hostile in Shewa, compared with in the Afar land which they had passed through.

[A Cecchi, vol I, 1886 p 156-157]

Chanoo, same as Channo, Ch'eno?

In the mid-1800s the village of Chanoo, near Ankober and Aliyu Amba, was allotted to merchants from Tajura.

[Abir 1968 p 62]

Channoo, on the frontier of Shewa, had one of the royal storehouses. During the second year of the stay of the Harris expedition, this storehouse was struck by lightning and totally burnt to the ground. It seems to have been mainly salt which was destroyed in this accident

[W C Harris, vol III, 1844 p 343]

(village with church Giyorgis)

22 January 1967: "Ciarveta is a recently-built village on the bleak crest of a 9,000 foot ridge and, despite this being the main road, our arrival caused quite a sensation." "I was given a friendly welcome in this square, two-roomed shack, where an icy wind cuts through the 'chimney-gap' between the tin roof and the tops of the mud walls. There is one iron bed, equipped with two filthy blankets, but most of the family sleep in hides on the floor. For the *faranj's* supper my hostess scrambled six tiny eggs - a sophisticated addition to the menu. Her method, however, was not sophisticated. The eggs were broken into a dirty enamel bowl and beaten thoroughly with very dirty fingers before being slopped into a probably dirty saucepan containing rancid butter and salt. Yet the result was excellent, though having stupidly lost my spoon I soon discovered that it is not easy to eat greasy scrambled eggs with one's fingers."

"The women of this area are more elaborately tattooed than most, mainly on their necks. Among highlanders a long neck is regarded as a sign of great beauty and attractively designed tattooed 'necklaces' are thought to accentuate the length."

"Jock /the riding mule/ is now amongst those present, because everyone affirmed that if left outside he would probably be stolen. Such a possibility has never been considered elsewhere, so this suggests that mule-stealing proclivities are among the fringe benefits of a motor-road."

[Dervla Murphy, In Ethiopia with a mule, 1969 p 129-130]
