??	Ubamale sub-district (-1997-)	../..	[n]
<i>Ubamer</i> , a tribe of the Ari-Banna group			
Haberland found the area of the Ubamer in the 1950s to cover 20-25 km east-west and 10-15 km north-south, with the Argenne to the east, the Sido to the south, the Dime to the west, and the Bargedda to the north.			
Caravan routes used to cross there, and Ubamer town was more populated before the Italian time. The headman of the Ubamer around 1950 was the middle-aged Wolde Amanuel, with two sons who had been educated in Addis Abeba. The elders of the Ubamer opposed Wolde Amanuel for having accustomed himself too much with the Amhara.			
There were five sub-chieftains for Kosamer, Aidamer, Garagir, Lulamer, and Shama, and altogether 33 clans.			
[Haberland 1959 p 167-177]			
text	E. Haberland, <i>Die Ubamer</i> , in <i>Altvölker Süd-Äthiopiens</i> , Stuttgart 1959 p 167-184.

JDB85	Ubicha (Ubiccia, Halicho) (stream) 08°58'/41°13'	08/41	[Mi WO Gz]
An affluent of the Gergertu (Jerjertu) in the Chercher area. There are Pre-Cambrian rocks. South-east of the gneiss alignment in the Ubicha valley a series of green schists occurs. However, in Ubicha valley the limestone, graphite schists, and pyritized quartzites occur as a thick series and are in disconformity with the green series.

HBT73c	Ujima , area in Sidamo Pink granite occurs in the gorge of Ujima valley. The name Sawana granite was given from another locality where this granite was first known. An erosion basin with a relatively large surface is developed south of the Aflata basin. The length of the main Ujima placer, including feeder placers, amounts to 47 km taking into consideration only the area included in the available aerial photographs. Only a small part of this drainage basin, belonging to the Adola series, has been found to be gold-bearing. In the portion of the placer located on gneisses, no gold has been found. HCE08c	Ula Ulo mountain about 40 km SSW of Kibre Mengist The serpentinite of Ula Ulo mountain is a round body with a diameter of 300 m. Talc lenses occur in the surroundings of serpentinite bodies. The serpentinites of this group have no commercial value as mineral deposits, as the nickel was not found in sulphidic form. A beryl occurrence has been indicated (Tassfaye et al. 1962) about 5 km north of Ula Ulo in the Gudba valley. Pyrite has been found associated with amphibole schists near Ula	05/39	[Mi]

Ulo mountain and the Dawa river.

Numerous garnierite veins occur in the western slope of Ula Ulo hill and were discovered along a road cut in the slopes. The Ula Ulo zone was drilled in 1963 and 1964, and chemical analysis was carried out in the laboratory of the Ministry of Mines. The tonnage of nickel as known at the end of 1963 was about 3,000,000 tons. There is an enriched ore zone with the highest grade of nickel (4.53%) indicated by the shows of garnierite. Cobalt content is only about 1/100 of the nickel content. Another deposit of the same type is found 2 km to the south of Ula Ulo. (The book on pages 333-335 contains a detailed description of how the minerals have been formed.)

?? Ulfula 10/42? [x]

A hunting party of Powell-Cotton camped there in early December 1899.

The neighbouring villagers performed a dance for them.

"We noticed /during the day's march/ a fine example of the Galla mode of sepulture.

In the centre was piled a large cairn; round this were arranged a number of rough stone-blocks, forming a complete circle on every side but one, where a small opening of about 9 feet in width was left. From the centre of this space, and pointing directly to the cairn, a line of short monoliths ran outwards, each of which represented a foeman slain by the dead warrior."

JDG45	Unda Bilen (/Lit./ Bilen) 09°28'/40°19' 740 m	09/40	[WO 18 Ne Gu]
	Place with hot springs, some 15 km east of Awash river on the old route from the coast to Shewa.		
	One of its springs, less hot (43.5°C) and less bitter tasting, used to supply water to travellers.		
	The caravan of Cecchi and other members passed there on 8 September 1877.		

They found Bilen inhabited by a small number of the Afar families Sidiabura, Algefadia, Adali and Daroma.

[A Cecchi, vol I, 1886 p 125]

The hunting party of Powell-Cotton spent four days near there in mid-December 1899.

"-- a celebrated hot spring, which bubbles up from the mud at a temperature of 110 degrees /43-44°C/ and forms a pool /some 25 m across and more than a metre deep in the centre/, with a soft muddy bottom. In this pool the water is cool enough -- to bathe -- The country round is thickly populated, and -- a big chief arrived for a course of baths with a following of two or three hundred. The overflow from the pool forms a small stream, which runs into the Hawash /some 6-8 km off/."

JDG24	Unte Village on the right bank of river Awash, above some rapids. [Guida 1938] 1928: "Our new friends squatted near the fires, and fell to talking with our men. -- Yet our men, and particularly the Plateau men, were none too happy at this close contact. They grinned somewhat painfully at the brotherliness of the savages. Every now and then a few	09/40	[Ne Gu]

of the visitors would get up and draw together, disputing hotly. They would stop in front of our tent, and point, and bend down towards the ground, peering through the dim light, and evidently trying to see something in order to decide a debated point. After a time they would withdraw -- we instructed our interpreter to tell them to depart, for our men needed sleep."

"We rose early in the morning, and prepared to leave. While we were loading, a silver jackal kept moving about the camp, or sitting on his haunches quite close to us. The men threw stones and pieces of charred wood at him, but he merely changed his position, refusing to go away. I told them to leave him alone, and thereafter he sat and enjoyed the anticipation of the feast of refuse which would be his when we had gone."

"The friendly Danakils were driving their sheep and goats to water when we forded the river in front of our encampment. We had been the cause of the animals losing their drink the night before, for the herdsmen had been afraid to approach while we were there. -- The ford was easily negotiated --"

[Nesbitt p 96]

- GDU42c Untu, near Kurmuk and Sudan 10/34 [x]
 William Avenstrup, who worked with gold projects in the early 1930s, was coming from Goha Gomarsha mountains and passing through Bashir to Untu when he wanted to meet his friend Sheik Nadir. However, the Sheik was in deep sorrow as he had lost his brother the previous day. Avenstrup declined to take part in all the eating and drinking in honour of the deceased man.

(U. Kidana Merhat) (church), see also under Zege

"I visited the main church -- You land at a makeshift dock, then proceed up a path for a kilometer through a marvellous forest. The church is fairly standard looking, but inside are impressive paintings. -- They depict scenes ranging from well known Christian themes to historical events in Ethiopia. The Holy Ghost mingles with John the Baptist. You can also see Abuna Aregawi -- climbing a snake to the church at Debre Damo.

Quite a few of the scenes reflect the conflict between the Jews and the Christians in Ethiopia. -- The paintings at Ura Kidane Bete depict St. Thomas being flayed and killed by Jews. They show cannibalism and child sacrifice. They show a host of saints spearing and beheading Jews."

There is another smaller church at the same site by the same name. They keep various

relics there, including crowns attributed to Emperors Tewodros, Tekle Giyorgis, and Yohannes as well as the King Ras Tekle Haymanot of the local region. They have a bible which dates apparently from the 800s and another from the 1300s. They also have one of those large crosses normally kept on the peak of the church's roof, a cross of iron and supposed to be from the 1300s.

[John Graham in AddisTribune 1999/12/03]

picts	G Hancock et al., Under Ethiopian skies, London 1983(1987) p 20 interior of church, 91 frescoes, 92 interior seen through doorway; S Gish, Ethiopia, New York 1996(1999) p 86 interior wall paintings; K Nomachi, Bless Ethiopia, Tokyo 1998 (English ed. 	The Rosen party travelled in this Oromo country and camped at Urga on 24 March 1905. There were streams named Urga in valleys on both sides, but on their map they could see a larger river Urga which they did not find in reality. There was rich vegetation in the valleys. [F Rosen, Eine deutsche .., Leipzig 1907 p 313]		
HCD87	Urgamo , at 35 km south-west of Dilla	06/38	[x]
	Site on a hill where a German ethnographic expedition in December 1934 studied decorated monoliths with human faces. Père Azaïs found four sculptures there and named the area Watadera. There were also undecorated medium-size phallus stones. How the monoliths had been grouped was impossible to determine - and a large tree had grown up and pushed apart one group. [Ad. Jensen 1936 p 99] The Germans could find again only two of the four sculptures described by Azaïs. They found that at least one stone had been fairly much demolished, and they thought it was a kind of revenge of the local people after the foreigner Azaïs had ended his measuring and photographing and left. [Ad. Jensen p 465-466]
