HDU63	<b>Rabel</b> (Rabel) 10°33'/39°36' 2965 m south-east of Were Ilu (centre in 1964 of Giske wereda) /this Rabel?/: The first airdrop of relief food was carried out on 13 February 1985 near Rabel, a village situated on a high plateau about 250 km north-east of Addis Abeba. "RRC agreed to the airdrop and gradually became a strong supporter of the operation which utilised a new airdropping technique developed in the United States. The grain was rebagged into double or triple sacks containing 25 kg each and placed on wooden pallets which were dropped from a height of 6 to 10 metres above the ground. No parachutes were used. The RAF planes, making four flights a day, carried 16-17 tonnes, and the Transall planes, which flew three daily flights, eight tonnes on each drop. The technique was called 'heavy free drop' and the drop zones had to be carefully selected to find a level surface and enough manoeuvring space between the hilltops to make the highly precise drops. The drop zones also needed to be sufficiently close to groups of villages so that the grain could be carried to distribution points and to the homes of the famine victims. The operation was called <i>Tesfa</i> ('hope' in Amharic) -- The procedure was very exacting. The pallets, 16 in the RAF plane and eight in the Luftwaffe plane, were pre-positioned on a set of rails fitted with small steel rollers, ready to be pushed out. The plane first made a dry run over the drop zone to be sure everything was in order. Then followed a loop around the plateau and an approach to the drop zone where, at a signal from the pilot, the pallets were pushed out, one on each approach. The crew handling the pallets were secured by attachment to a rail running along the sides of the plane. When the drops had been completed hundreds of people, supervised by RRC officials, rushed down a slope, picked up the bags and carried them to a collection point nearby. Every single grain on the ground as a result of damaged bags was collected. Two Polish helicopters, carrying a British ground party of two or three men and members of an Italian medical team, were the first to fly out each day to select and prepare the drop zone." [Jansson et al 1987 p 40-41] Observers were flown to the area in Polish helicopters to see how British and West German transport planes dropped sacks of grain as famine relief. [UNDRO News, Jan/Feb 1985 p 5] Around 20 January 1990 ENA news agency said that government forces had recaptured Rabel from the TPLF.	10/39	[Gz Ad]

1936	Ras Imru had a young man of 22 years by name Yohannes whom he seemed to trust. In the beginning of February 1936 Yohannes had heard that a team of Italian road workers		

were stationed at Rama, at least 50 km behind the war front, so they were not guarded. Yohannes started with about 300 soldiers and by moving about 70 km in darkness they reached Rama at 4 o'clock in the morning. All the about 500 workers were asleep. The wild soldiers of Yohannes shot or cut dead everybody they could hit. Only the engineer was armed and he defended himself and his wife and little daughter like a lion. When he had only three cartridges left, he shot his child, his wife and himself. His local nursemaid was killed by the soldiers.

Some 80 Italian workers had been murdered. The others fled to the forest and escaped, save four of them who were taken prisoners. However, the Gojjam force was also punished because a store of dynamite blew up and killed many of them. When it came to plundering the camp they started quarrelling and shooting each other. Those 95 who were left at the end mutilated the dead men and even the two dead women.

"Everybody loathed what had happened. It was the last time that mutilation occurred on the Ethiopian side of that front."

[H Nyström, *Med S:t Ghiorghis ...*, Sthlm 1937 p 114-115]

- 1950s In late 1959 injera was baked and distributed as food aid from the Mekane Yesus Church.
- 1960s A clinic built by the ESIBT Field Activities ("Building College") was handed over to the American Lutheran Mission on 11 December 1965.  
The primary school (in Adwa awraja) in 1968 had 118 boys and 58 girls, with 4 teachers.
- 1970s An elementary school building constructed of concrete elements and with Swedish assistance through ESBU was completed around 1970.  
[SIDA 1971]

Valley in the Chercher area with affluents Jaja, Waju, Soka, Lagagaba, Kotu. The Pre-Cambrian rocks show various degrees of metamorphism and habitus. It is possible to distinguish many types of concordant faulted rocks which form zones from northwest to southeast.  
Lead minerals occur in a small 5 km long valley joining the Ramis river near Wolde Ramis.  
Graphite schist is found rather south in the Ramis valley, but the graphite content is usually low in the region.  
The Ramis valley contains among the largest reserves of marble in the Chercher area.

ras dejen: *dejen* (däjän) (A) rear guard

1900s The hunter Powell-Cotton was in the area in June-July 1900 and shot several ibex.

1950s A radiometric reconnaissance flight was made by Towle in 1955 and it included a tour around the top of Ras Dashen.

No anomalous radioactivity was detected.

[Mineral 1966]

At Ras Dashen, highest mountain in Ethiopia, the only cultivated plants are wheat, barley, rye, and flax-seed, and this is at an elevation of about 3,350 m and not at the peak.

[Simoons 1960]

1960s A group of Japanese who had scaled Ras Dashen were received by the Emperor in the capital on 1 June 1966. Similarly, a Polish group was received on 25 February 1969, and 14 Bulgarian alpinists were received on 8 April 1969. The Polish team took about 12,000 still pictures and three short films during their expedition.

[News]

"At 10.30 /on 15 January 1967/ a short, steep climb brought us to a wide pass from which Ras Dashan was visible. It is a most unassuming mountain - merely a long ridge of rock on which one point is slightly higher than the rest - and without a guide one could never pick it out from amongst the many other mountains that here sprawl gloriously against the sky."

"Mike was looking ill, but he doggedly tackled the next lap - a long walk around spur after spur, across sunny slopes of golden turf dotted with two-foot lobelias. (The higher the altitude the lower the lobelia.) Between these level stretches there were a few muscle- and lung-straining climbs and by midday thirst was tormenting me -- Foolishly, I had left my water-bottle in camp, not realising that above river-level all streams would be frozen. (They were a very beautiful sight - gleaming tongues of ice hanging from the mouths of dark caverns near the summit of every mountain.)"

"By one o'clock an exhausting climb had taken us on to the Ras Dashan plateau, where the path skirts the western flank of the summit ridge and swings around to run parallel with the ridge on its southern side, across a wide, bleak plain littered with chunks of rough volcanic rocks. Half-an-hour later the mule was tethered to a stone and we were led off the track towards the established route to the summit. The incline was easy, yet at this height our clamberings over rock-slabs and massive boulders felt strenuous enough, and we spent twenty minutes covering that last half-mile. Then a real climb of some fifty feet took us to the highest point in Ethiopia -- I crawled on to the summit, feeling very like a fly that had just been sprayed with D.D.T."

"Twenty minutes later, when we had decided that Mike must have turned back, Ian suddenly glimpsed him in the distance, wandering away both from us and the mule. No one in a normal state could possibly go astray on that plain, with Ras Dashan to guide them, and as we scrambled down from the summit Mike's gait changed to a wavering stumble - so while Ian went straight to him -- I continued south-west to the pass - unable to repress a selfish joy at being briefly alone with Ras Dashan --"

"As we lost height Mike recovered rapidly, and told us that while wandering on the plain he had 'seen things' and heard voices calling from the wrong direction. I hadn't known that these classic symptoms of mountain-sickness could develop at such a comparatively low altitude."

[Dervla Murphy, In Ethiopia with a mule, 1969 p 110-111 (1994 p 113-115)]

1990s There are three distinct points, and most trekkers head for the one on the left (when starting from the village of Ambikwa). It takes about 2-3 hours to reach from one peak to another of the three.

[Lonely planet 2000 p 182]

Ras Dashen is outside the Simen National Park, to the east. [Camerapix]

 "On making another detour, we came to a place where the upturned stones had been cemented again by a new lava-flow. This had formed a level floor, out of which the older stones protruded like decaying tombstones, set at all angles. Between these latter we threaded our way, bruising and cutting our elbows and knees against them. The camels suffered far more than we did, for it was terribly difficult for such ungainly animals to pass through the narrow spaces between the stones without coming into contact with them."  
 "Presently we came to yet another cliff, which overlooked the Realu Plain, to the south-east of Mount Afdera. The southern flank of the great volcano consisted of five successive steps, pointing to the occurrence of five separate eruptions, each one slightly less copious than the one which preceded it. At the apex was a small truncated cone which looked like a toy placed on that huge massif."

 flowing into lake Tana at its east shore  
 Female traveller around 1960: "I came suddenly on the Reb which was a deep muddy gash in the plain. The bank fell away sharply to the water below which made its way through grey alluvial silt. I stopped the car and went down to test the ground. The bank opposite looked reasonably firm, so climbing back into the car I drove to the edge. We dived sharply off the bank, and, as we ran to the base of the river, the weight of the rear swung the back wheels sharply to the left in a bad skid. With a sickening squelch she sank deep in the wet mud. The wheels began to spin and I was completely stuck!"  
 "Half an hour later I had moved most of the cargo out of the vehicle and was completely covered with mud. The Land-Rover was a few inches further down in the mud, and now, on the high bank, a row of boys stood watching me with interest. -- Finally I beckoned the spectators towards me and set about organising a line of workers to bring stones to make a quarry. It would take a day or two and probably use up whatever money I had, but it was my only chance."  
 "At this moment two men in a red jeep appeared at the top of the other bank. -- It was an I.H.A. vehicle and the men were making a dash for Gondar to pick up a spare part for a lorry. The driver, a Sudanese, greeted me with a wide grin. 'You are lucky,' he said, 'you might not see a vehicle here for weeks.' -- They put a tow-rope on the Land-Rover and she was out in a matter of minutes.  
 [Barbara Toy, In search of Sheba, London 1961 p 168-169]  
 Later a helicopter used to carry Barbara to spend a night on the top of the 'prison mountain' Wehni landed near Reb river before the final flight.

 Rebbi Arienni (R. Erienni) (hill/pass) 2243 m 14/39 [Gu n]  
 An imposing block of granite jutting up beside the road. It was from here that the Italians began the last stage of their march into Adwa in 1896.  
 Just past the peak of Rebbi Arienni is a small valley north of the road. In this valley is the site of Yeha with an important ancient ruin, a 10 km trip.  
 [Welcome to Ethiopia, A.A. circa 1965 p 171, 173]  
 The track heads off past the foot of an immense basalt peak. After about 3 km the village of Yeha appears, dominated by the ruins of a temple.

HEK21	<b>Rib</b> (Rib Ras, Reb, Irb) estuary at 11°59'/37°34' River with its outlet in eastern lake Tana. "Our next camp /April 1933/ was at the estuary of the Rib River. We found that the lake was extremely shallow with a floor gradually shelving away from the land, and a mile out we were punting in four feet of water. Fogara villagers cultivate some of the land at the lake-level. -- Along the shore-line there was a broad belt of maize, which is sown on the damp ground as the lake recedes." "The Rib brings down quantities of dark sand, and we passed banks of it deposited on the lake shore. The river bar, 600 yards out in the lake, is a semicircle, and parties of travellers with loaded donkeys were passing round it instead of crossing the river. It made a firm sandy road covered by two feet of water --" "Two miles up the Rib there is a <i>tankwa</i> port on one of the most important trade routes for lake traffic. Merchants of Ifag, a small town near by, load bars of rock-salt at the village. - - We had met several fleets of as many as a dozen <i>tankwas</i> loaded with salt-bars on this route. They follow the coast at first and then strike across the open water to Zegi. On the return journey the cargo would be Zegi coffee --" "Not many years ago this was the route much used by slave-traders, who brought their victims openly from Southern Abyssinia, crossed the Blue Nile at the ford below Gumr Market, used the returning salt <i>tankwas</i> to take them over Lake Tana, then went to Ifag and from there to the Danakil deserts with the caravans engaged in the salt trade, and from the Red Sea coast by dhow to Arabia. -- In the last few years this and other slave-trade roads have been closely watched by specially appointed Abyssinian officials -- and it is doubtful whether at the present time the routes are used for any but legitimate trade." "Fifteen miles /24 km/ from the estuary the Rib is crossed by a masonry bridge that carries the old royal road from Gondar to Debra Tabor. -- the similarity between its style of architecture and that of Portuguese bridges in the country leaves little doubt that it was built by the Jesuit Fathers or the artisan that accompanied them --" [R E Cheesman, Lake Tana & the Blue Nile, London 1936 p 184-186]	11/37	[Ch WO Gz]

HEJ09	Rima (island in lake Tana) The church also described above as Remha Medhane Alem. March 1933: "-- fifteen minutes' rowing brought us to the island of Rima, 300 yards in diameter and 20 feet high. On it stands another church of /Medhane Alem/. A book called <i>The History of Mary</i> states that it was founded in the reign of Isaac I by his brother Aba Nom, and rebuilt by Ras Gugsu -- Another volume, entitled <i>Monograph of Walatta Petros</i> , is probably unique. Walatta Petros, a nun, was tortured and chained up by the Emperor Susenyos -- because she refused to abjure the faith of her fathers and to take Mass as the Roman Catholics did. Her persecution ended when Fasiladas came to the throne -- Her coffin is in the Holy of Holies in Rima Church where she used to pray -- The bones of the Emperor Sarsa Dengel, Aba Nom, Abuna Bertlomaos, and the father of Walatta Petros, are also in the Holy of Holies at Rima. In the Kidist the bones of several nobles lie in massive coffins which are tree-trunks hollowed out." Cheesman describes the stone bells, some pictures with European traits, and a tall wooden cross leaning against the wall, with a well-painted life-size figure of Christ. "We were next shown a blue-and-white jar, several feet high, of Chinese porcelain, I think, which had been used to bring the entrails of the Emperor Sarsa Dengel from Sennar. He had died /1597/ of fever while fighting -- in the country now known as the Sudan -- On leaving Rima we were rowed across the water to the mainland and spent the night below Gugebi, a volcanic hill with lava-cores exposed --" [Cheesman 1936 p 168-170] On a promontory is the church of Tima Yohannis.	11/37	[Ch Gu]

 7NE Tullu Shato (T. Sciato) (hill) 2560 m  
 The town of Robe lies on the main Goba road 25 km past Dinsho and 13 km before Goba itself. It is a large town with adequate facilities, but strangely subdued and nondescript, straggling for a couple of kilometres along a eucalyptus-lined main road. There are few compelling reasons to stay in Robe, unless perhaps you are heading to Sof Omar.  
 [Bradt 1995(1998)]
- 1960s The Negus Sahle Selassie primary school (in Ticho awraja) in 1968 had 479 boys and 152 girls, with 10 teachers.  
 /this Robe?/ An elementary school building constructed of concrete elements and with Swedish assistance through ESBU was completed around 1970.  
 [SIDA 1971]
- 1970s With sub-post office using spelling ARUSI ROBE in its postmark, and with petrol filling stations of Shell and Total (-1978-).
- 1980s Population about 11,300 in 1984.
- 1990s There is a Bekele Molla and a variety of other hotels at Robe. The road to the Sof Omar caves is easy to find - it goes from the only traffic circle in Robe - just ask the direction to Goro /about 60 km east/.  
 [John Graham in AddisTribune 2000/01/06]  
 Finding transport out of Robe towards Dodola can be difficult as most buses come from Goba and will be full when they pass through Robe.

The Bekele Mola Hotel is, for once, well signposted on the Goba side of town. Another above-average hotel - I'm told it's called the Metaforak Hotel but there are no signposts to confirm this - has rooms with private cold showers and toilet. If asking for it by name proves unproductive, it's on the Dinsho side of town. Otherwise, there's the usual selection of mostly anonymous dollar-a-night affairs.

[Bradt 1995(1998) p 196-197 with town plan sketch]

[Aubert 1999 has an area map on p 78]

With police station. Airport is nearby in Goba.

The Teacher Training Institute for Bale used Oromo as language in the 1990s.

Population 21,138 in 1993 (estimate) and about 26,500 in 2001.

HDU07	Robi (area) stream at 10°00'/39°59' An east-west area at Robi river was one of the about fifteen most important cotton production areas in Ethiopia (except Eritrea) in the 1950s. "After crossing the Robi River (226 km from A.A.) the road comes to the small village of Robi and then passes a prison. On Mondays a market is held just off the road at 269 kms. A deserted field the other six days of the week, on market day it is swarming with thousands of people." [Welcome to Ethiopia, A.A. circa 1965 p 63] /which Robi?:/ In a survey 1960-61 there were seen in a Saturday market about	09/39	[Gu]

150 cattle.

The Emperor visited the Robi prison farm in late June 1961 when he was travelling to inspect damages and relief work after earth tremors in the Kara Kore and Majete areas. [Ethiopian Herald]

/this Robi?/: A prison farm at Robi in Arsi provided facilities for about 850 prisoners in the 1980s.

- HD... Robi (in Yifat & Timuga awraja) 10/40 [Ad]  
The primary school in 1968 had 208 boys and 91 girls, with 5 teachers.  
HDL56 Robi Meda (R. Mieda) (plain), cf Mieta Robi 09/39 [+ WO]  
see under Webera

*robit* (A) fourth generation of a union between a slave woman and a free-born Ethiopian

- HDU17 **Robit** (Shewa Robit, "Shah Robit") 10/39 [MS Br Po x]  
By going 4 km along a track from Shewa Robit and then walking for about 40 minutes one can reach the locality Gozie, where there is a mosque built of masonry.  
1960s The 1967 telephone directory gives six numbers, of which one for the prison and one for Virginia Tobacco experimental & processing station. Those on personal names are for Belayhun W/Amanuel, Gabre Yelem Wossen, Teshome Armidie, Wagaye Kelile.  
1970s With sub-post office and petrol filling station of Agip (-1978-).  
1980s Population about 9,800 in 1984.  
June 1985: "Shah Robit is a one-street town of ramshackle adobes. The hotel we visited was made of mud with straw on a wood frame, walls stuccoed or painted, roof of corrugated iron. Doorways were small and crooked but there was electricity, a refrigerator and a shower. Children and chickens roamed everywhere. -- Except for the people, this could have been India or Egypt or Colombia or Bolivia."  
[P M Sutton, Ethiopian journal, USA 1986 p 62]  
1990s Population about 14,300 in 1994 and about 17,600 in 2001.  
Some of the Argobba ethnic group are said to live there around 1990.  
Robit and Debre Sina are both significant towns, but Debre Sina looks the more interesting of the two.  
[Bradt 1995(1998)]  
Robit has a colourful market on Wednesdays, attended by people as far away as 50 km. Passing over the Robit river, the road /towards Debre Sina/ gradually ascends from the Rift Valley floor, through cultivated areas where sorghum, maize, cotton, and tobacco are grown.  
[Camerapix 1995 p 118-119]

- HEJ18 Robit 11°55'/37°20' 11/37 [MS]  
(on Dek island in lake Tana?)  
HEJ68 Robit (town) 12°21'/37°22' 1827 m, north of Gorgora 12/37 [Gz]

HD...	<b>Roge</b> (Rogge, Roggié) (historical) Roge lay on the slopes of Mount Yerer and was for about 1800-1875 the principal market for slaves. Alamanni stated that it had a population of about 10,000 mainly traders, and that annual sales of coffee were 30,000-40,000 kg. [Journal of Ethiopian Studies vol II 1964 no 2 p 46] A. Cecchi estimated in the 1870s that 3,000-4,000 slaves a year were sold at Rogge. The Rosen expedition of Germans passed there in early February 1905 and saw the ruins with several remains of stone walls. When they mounted the plateau they could see as far as Addis Abeba, to where they were headed. [F Rosen, Eine deutsche ... Leipzig 1907 p 166]	08/38	[x 18]

	Area at the left bank of Mareb river at about 14°40'N. Mansfield Parkyns arrived there in the beginning of October 1843 and stayed for nine months. Coming from the south they passed a village called Inda Maryam from its church /same as HFK07?/. They passed several other villages and remains of villages. For water, these depended on wells dug in the sand of dried-up watercourses. The principal villages were HF... Tokulimni, HFD78 Adi Nebried (A. Nebrit) and HF... Mai Chena. When approaching the Mareb valley they climbed a very steep hill. "Near the top of it we found a pretty little hamlet, called Addy Harisho, where we were hospitably and comfortably lodged by the lay-dean and chief of the district, Apha-Memher Waddy-Hil." [M Parkyns, Life in Abyssinia, vol I, London 1853 p 257-259] "Rohabaita is a small district or province belonging to the Church, but in some measure dependent on the chief of Addy-Abo. It consists principally of a cluster of hills, bounded on the eastern side by the valley of the Mareb, on the west by Addy-Abo, south by Médevai /HFD97 Medebay/, and north by the country of the hostile Shangalla. The villages are built principally near the summits of the hills, from fear of the sudden attacks of their enemies, and of the fatal malaria which at certain seasons of the year prevails in the low valleys. -- A few acres of millet are sometimes cultivated on the mountain tops near the villages, but in quantity very insufficient for the wants of the population. The low plains -- are therefore employed for this purpose." Parkyns was offered by Dejazmach Lemma "the government of Rohabaita and another neighbouring district" and would have been very willing to try such a position, but as he left Ethiopia before it could start, nothing came out of the offer. [Parkyns p 263-265]
